**Bluetooth Developer's Kits from Stonestreet One to be Demonstrated at CTIA Wireless IT 2000 Conference**

Louisville, KY, October 13, 2000 - Bluetooth Developer's Kits from Stonestreet One will be demonstrated at the CTIA Wireless IT 2000 conference in Santa Clara, California October 17th and 18th at AirDesk, Inc.'s booth (number 1247). Stonestreet One recently signed an agreement with AirDesk, Inc., a premier distributor of wireless hardware and software components, to distribute Stonestreet One's products. The Bluetooth OEM Module from Stonestreet One will also be shown at the conference.

With the Bluetooth Developer's Kit and OEM Modules from Stonestreet One, wireless developers can add Bluetooth functionality and connectivity to new or existing products at a fraction of what most other development kits cost. The Bluetooth Developer's Kit and OEM Modules from Stonestreet One allow developers to integrate the Bluetooth standard into a multitude of platforms and digital devices, including PCs, palm devices, and custom-designed microcontroller/microprocessor based hardware. The Bluetooth Developer's Kit and OEM Modules from Stonestreet One communicate with a host controller via a serial interface (USB, RS232, and UART interface options). They are designed to support both voice and data communications, and are suitable for use on any type of device requiring the Bluetooth wireless communication standard.

"Stonestreet One is establishing itself worldwide as a leading provider of Bluetooth applications and related products. We are happy to be associated with AirDesk, Inc. and are looking forward to demonstrating our products at the CTIA Wireless IT 2000 conference," said Joe Reilly, Vice President Sales and Marketing for Stonestreet One.

Stonestreet One, Inc., based in Louisville, Kentucky, designs, develops, and integrates embedded software and wireless data applications. It specializes in Bluetooth applications, products and services, including developer tools, modules, and protocol stacks.
