Stonestreet One and gigaAnt Form Strategic Alliance

Louisville, Kentucky - December 5, 2000 - Stonestreet One, a provider of Bluetooth products and services, including turnkey Bluetooth application development and integration services, is pleased to announce it has formed a strategic alliance with gigaAnt, a subsidiary of Hexagon Wireless, one of the world's leading suppliers of terminal antennas for mobile applications through its Moteco subsidiary. gigaAnt specializes in the design and manufacture of antennas and antenna solutions for use in Bluetooth devices. The alliance allows gigaAnt's customers to look to Stonestreet One for Bluetooth design, development, and integration services while Stonestreet One calls on gigaAnt for expertise and resources in the area of radio frequency and antenna design and manufacture. Stonestreet One will also feature gigaAnt's antennas on certain Bluetooth hardware products from Stonestreet One, including the Bluetooth Developer's Kit from Stonestreet One.

"This alliance gives Stonestreet One a very competitive edge against other providers of Bluetooth solutions. In addition to our own expertise, we can now offer our customers multiple levels of radio frequency and antenna design resources. This means our customers get the best design solutions available," said Joe Reilly, Vice President Sales and Marketing for Stonestreet One.

Stonestreet One, Inc., based in Louisville, Kentucky, designs, develops, and integrates embedded software and wireless data applications. It specializes in Bluetooth applications, products and integration services, including developer tools, modules, and protocol stacks. For more information on Stonestreet One products and services please visit <http://www.stonestreetone.com> or contact us at 502-339-2999.

gigaAnt is based in Lund, Sweden, and is a subsidiary of Hexagon Wireless. Hexagon Wireless is listed on the Swedish Stock Exchange. gigaAnt develops, manufactures and supplies internal, external, embedded, and customized antennas dedicated to short-range wireless devices used in Bluetooth technology, HomeRF, and Wireless LAN applications. gigaAnt offers a full range of antenna development support and radio frequency testing. For more information on gigaAnt please visit <http://www.gigaant.com> or contact them at 46 (0) 46-286 21 86. For more information on Hexagon Wireless and Moteco see <http://www.hexagon.se> and <http://www.moteco.se> respectively.
