

## **Stonestreet One Announces UltraSuite™ Product Availability**

**Carlsbad, CA, January 4th, 2006** - Stonestreet One, a leading provider of short range wireless software solutions and engineering services, today announced beta availability of [UltraSuite™](#). UltraSuite includes [Wireless USB Host Wire Adapter](#) (HWA) and Device Wire Adapter (DWA) drivers, [WiCenter™](#) connectivity software, and the [UltraView](#) engineering tool. UltraSuite supports Windows XP today and thereby allows commercial shipment of Windows products based on Certified Wireless USB in 2006. This release of UltraSuite includes end user driver support and is targeted to chipmakers for performance tuning, functional testing, and stack throughput verification. UltraSuite is currently shipping to pre-release customers and will be demonstrated at the Stonestreet One booth in the WiMedia Tech Zone at the upcoming 2006 CES show in Las Vegas January 5-8.

Stonestreet One has been working with Staccato Communications' development kits to verify and enhance functionality of the drivers. "In our initial evaluation of the UltraSuite drivers for Certified Wireless USB, we have been pleased with their performance and reliability," said Jason Ellis, Sr. Manager, Business Development & Marketing of Staccato Communications.

"This installment of UltraSuite will enable our pre-release customers to enter the 2006 UWB market with production quality Windows HWA and DWA drivers and connectivity software," said Dick Smith CEO of Stonestreet One. Future releases of UltraSuite will be based on the WiMedia specifications and will achieve the **Certified Wireless USB designation**. Stonestreet One's product roadmap includes support for Windows Mobility, Linux®, VxWorks®, among others.

### **About Stonestreet One**

Stonestreet One is a leading provider of software and engineering expertise for short-distance wireless communications with products and expertise in Bluetooth, 802.11, Ultrawideband, and Zigbee®. The company's Bluetooth protocol stack Bluetopia® is promoted and used by leading chipmakers, distributors, embedded software companies, and OEMs around the world in industries including automotive, biomedical, aerospace, mobile communications and consumer electronics.
