Stonestreet One to Develop Bluetooth Training Course for Zsigo Wireless Training

Louisville, Kentucky - February 22, 2001 - Zsigo Wireless, the world's largest independent training organization for engineers and developers in wireless technologies, has engaged Stonestreet One to develop the content for a comprehensive new Bluetooth technology training course. Stonestreet One, an Associate Member of the Bluetooth Special Interest Group, will combine its thorough knowledge of the Bluetooth Specification with its extensive experience in developing Bluetooth applications to build the courseware. In addition, Zsigo Wireless Training will utilize the Bluetooth Developer's Kit from Stonestreet One in its training program.

Bluetooth is a revolutionary new low cost, radio-based technology that provides an open standard for short-range wireless communications. Designed to enable wireless transmission of data and voice, Bluetooth technology eliminates the need for cables.

Joe Reilly, Vice President of Sales and Marketing for Stonestreet One said, "We are honored to be chosen by Zsigo Wireless to develop their Bluetooth training course. The course will be developed by engineers with a great deal of real-world experience in designing Bluetooth hardware and software. The result will be a course rich in detail and practical know-how." Konstantin Zsigo, President of Zsigo Wireless Training, Inc., concurs, adding "We are pleased to be partnered with Stonestreet One in providing this invaluable, highly detailed technical training resource to both present and potential members of the Bluetooth product development community."

Stonestreet One designs, develops, and integrates embedded systems and wireless data applications. The company specializes in Bluetooth technology, offering engineering services, hardware for developers and end users, and a BQB listed Bluetooth Protocol stack. For more information visit www.stonestreetone.com.

The classroom course (also available as a complete self-directed learning product) will be conducted by Zsigo Wireless Training for the first time ever May 16-18, 2001 in England. Product Developers who are interested in creating effective Bluetooth implementations should visit <http://www.zsigo.com> today to book an instructor led Bluetooth course or to order the comprehensive self-directed training package.
