

Stonestreet One Introduces UltraSuite™ - Blue Edition for Bluetooth® Technology

Louisville, KY, and Carlsbad, CA, April 4th, 2006 - Stonestreet One introduced today [UltraSuite-Blue Edition](#), enabling WiMedia™ semiconductor manufacturers to support high-rate Bluetooth technology in addition to [Certified Wireless USB](#) and WiNet. UltraSuite-Blue Edition adds [Bluetopia®](#), Stonestreet One's portable, upper layer [Bluetooth protocol stack](#), to UltraSuite's host drivers for **WiMedia Alliance-based Certified Wireless USB** and **WiNet** on Windows XP and Vista. UltraSuite-Blue Edition is immediately available.

In response to requests from semiconductor manufacturers, UltraSuite-Blue Edition includes the source code of [Bluetopia](#), providing maximum flexibility for developing embedded or hosted Bluetooth solutions. With the source code, semiconductor manufacturers can be quick to market with complete solutions for high-rate Bluetooth.

“Bluetooth chipmakers that sell a combined hardware/software solution dominate the existing Bluetooth market. Forward thinking WiMedia chipmakers recognize this trend. The software expertise required to produce and support a robust Bluetooth stack and related profiles falls outside the core competency of most chipmakers. Access to Bluetopia source code allows chipmakers to rapidly introduce competitive high-rate Bluetooth products,” said Richard Smith, president of Stonestreet One.

[Bluetopia](#) was first qualified in December 2000, and is used by leading chipmakers and OEMs in industries such as consumer electronics, biomedical, industrial, and automotive. As an Associate Member of the Bluetooth SIG since 2000, and a member of the WiMedia Alliance since June 2005, Stonestreet One is uniquely positioned to rapidly release a compliant version of UltraSuite-Blue Edition following approval of the final specification by the Bluetooth SIG.

About Stonestreet One

Stonestreet One is a leading provider of software and engineering expertise for short-distance wireless communications with products and expertise in Bluetooth, 802.11, and Ultrawideband. For more information about Stonestreet One please visit www.stonestreetone.com
