

Stonestreet One Announces Ultrawideband Product Availability

Louisville, KY, September 27, 2005 - Stonestreet One, a leading provider of short range wireless software solutions and engineering services, today announced alpha availability of [UltraSuite™](#), its Windows XP® solution for Ultrawideband (UWB) based technologies – [Wireless USB Host Wire Adapter](#) (WUSB HWA), WiMedia™, and Beta WiNET. Initial versions of UltraSuite are now shipping to pre-release customers. This early version of UltraSuite includes end user driver support as well as features targeted towards chipmakers and OEMs for performance tuning and functional testing.

Future releases of UltraSuite will include drivers with full feature support, engineering tools, and documentation as well as support for WiCenter™, Stonestreet One's user interface product for user management of wireless networks. UltraSuite will be compliant to the WiMedia standards and achieve the **Certified Wireless USB designation** and will support other operating systems such as Linux® and VxWorks®.

“Stonestreet One has leveraged its deep experience with Bluetooth® and other wireless technologies to produce what we believe will be an industry leading [UWB software solution](#),” said Richard Smith, President of Stonestreet One. “We are committed to an aggressive schedule for the future releases of UltraSuite to satisfy the time-to-market demands of our partners and customers.”

Ultrawideband is a communication technology that can deliver very high speed wireless network data exchange rates (up to 800 Mb/s) across relatively short distances. Stonestreet One helps chip developers and OEMs realize the full potential of this RF technology in the digital home for both PC and embedded products.

About Stonestreet One

Stonestreet One is a leading provider of software and engineering expertise for short-distance wireless communications with products and expertise in Bluetooth, 802.11, Ultrawideband, and Zigbee®. The company's Bluetooth protocol stack Bluetopia® is promoted and used by leading chipmakers, distributors, embedded software companies, and OEMs around the world in industries including automotive, biomedical, aerospace, mobile communications and consumer electronics.
