STONESTREET ONE ANNOUNCES FIRST SHIPMENT OF CERTIFIED WIRELESS USB SOFTWARE

UltraSuite® and WiCenter® Products Enable First Wireless USB Hub and Adapter Solutions

Intel Developers Forum, San Francisco, CA (September 18, 2007) – Stonestreet One, Inc., the leader in WiMedia-based ultrawideband (UWB) and Certified Wireless USB software solutions for PC and embedded systems, today announced the production shipment of its UltraSuite® for Windows and WiCenter® Basic for Wireless USB software.

Stonestreet One's wireless software powers the new IOGEAR Wireless USB Hub and Adapter, Model GUWH104KIT, which provides a Certified Wireless USB solution for connecting wired USB devices including printers, external hard drives, scanners, and media players.

Richard Smith, president of Stonestreet One, said, "We are excited to be part of the first wave of Certified Wireless USB products to reach the market, and are playing a key contributing role in leading the charge to enable this new wireless technology ecosystem. Our UltraSuite and WiCenter products are helping PC and peripheral manufacturers to quickly bring this important technology to market."

UltraSuite is Stonestreet One's portfolio of software drivers and MAC software that enable WiMedia-based wireless solutions, including support for Certified Wireless USB, WiMedia Link Layer Protocol (WLP), and Bluetooth. UltraSuite supports a variety of systems from PC's to embedded devices, cell phones, peripherals, and consumer electronics equipment.

Stonestreet One's flagship WiCenter software delivers breakthrough capabilities in the user experience for connecting and managing wireless devices. The patent-pending WiCenter platform includes built-in support for Certified Wireless USB systems as well as optional support for other radio platforms, including WiFi, Bluetooth, and current and emerging wireless PAN, LAN, MAN, and WAN technologies. WiCenter

provides a unique and easy to use interface that supports the discovery, security, association, and connection management of wireless devices. WiCenter is available today for Microsoft Windows and Windows Mobile-based systems.

Stonestreet One is demonstrating its products including WiCenter and UltraSuite this week at the Intel Developer's Forum at the Moscone Convention Center in San Francisco, September 18-20, booth 830 in the Certified Wireless USB Community Pavilion in the Technology Showcase.

About Stonestreet One

Stonestreet One is a leading provider of wireless communications software products including UWB, Bluetooth, WiFi, and related technologies. The company's WiCenter® wireless management application, WiMedia ultrawideband stack, UltraSuite™, and Bluetooth protocol stack, Bluetopia®, are promoted and used by leading chipmakers, distributors, embedded software companies, and OEMs around the world in computing, automotive, biomedical, mobile communications and consumer electronics products. The company is an active contributing member of the USB Implementers Forum, the WiMedia Alliance, and the Bluetooth SIG. Stonestreet One is headquartered at 322 West Main Street, Louisville, Kentucky 40202, USA.
