### **STONESTREET ONE SELECTS QUALCOMM'S GOBI SOLUTION**

*WiCenter® Platform Extends Support To Mobile Broadband Internet Services*

**GSMA Mobile World Congress, Barcelona, Spain (February 11, 2008)** – Stonestreet One, Inc., the industry leader in WiMedia-based ultrawideband (UWB) and Certified Wireless USB software for PC and embedded systems, today announced that it is adding Qualcomm's Gobi (Global Mobile Internet) support to Stonestreet One's portfolio of wireless software products.

"Our work to integrate Qualcomm's Gobi technology into our industry-leading software products clearly benefits our customers and expands the value we bring to notebook manufacturers," said David G. Brenner, vice president of marketing and business development, Stonestreet One. "The combination of Gobi-enabled laptop computers with our WiCenter wireless device and connection management application yields a seamless and consistent experience for users, and extends today's wireless PAN and LAN capabilities to a high-quality broadband data connectivity for mobile users worldwide."

Stonestreet One's products include UltraSuite®, a comprehensive set of software services designed to run on hardware platforms based on the WiMedia UWB specifications, including Certified Wireless USB, WiMedia Link Layer Protocol (WLP), and next generation high data rate Bluetooth. Stonestreet One also offers corresponding Bluetopia® Bluetooth stacks and profiles for a wide variety of platforms and operating system configurations from PCs to embedded devices, mobile phones, peripherals, and consumer electronics equipment. Complementing these products is WiCenter®, Stonestreet One's novel user application for PC and embedded applications that provides advanced features for discovering, connecting and managing wireless devices and services, now including Gobi-enabled wireless broadband, using a consistent, friendly and intuitive graphical interface.

Stonestreet One is showcasing its wireless software technology and products this week at the GSMA Mobile World Congress in Barcelona, Spain from February 11-14, 2008 in the WiMedia TechZone Booth #A73 located on the ground floor of Fira de Barcelona, Hall 2.

### **About Stonestreet One**

Stonestreet One is a leading provider of wireless communications software products including UWB, Bluetooth, WiFi, mobile broadband, and related technologies. The company's products are promoted and used by leading chipmakers, distributors, embedded system companies, and OEMs around the world in computing, automotive, biomedical, mobile communications and consumer electronics applications. The company is an active contributing member of the USB Implementers Forum, the WiMedia Alliance, and the Bluetooth SIG. Stonestreet One is headquartered at 322 West Main Street, Louisville, Kentucky 40202, USA.
